I understand that our librarian, Miss Clarice Krieg, is writing to request that the Janis Studies be made available to the University of Oregon. I hope that your organization will find it possible to provide us with copies of these studies since we will find them quite useful in our program. We should also appreciate it if we could be put on the list to receive copies of duplicate maps which are available for distribution to universities.

We have on this campus a strong department of geology and geography, and these materials would add significantly to those available for this work. We realize the necessity of developing the work of this area and wish to take advantage of any opportunity to secure useful materials.

Sincerely yours,

Harry K. Newburn

Harry K. Newburn  
President
